# The Brand

”

*The light that surrounds us defines how all things look and has a strong influence on our state of mind. We believe that a positive and cozy environment needs the appropriate light to make people comfortable.*

*Technology today enables us to deliver customizable and highly efficient light that can enhance our feelings. Therefore, lamps must be functional and technically advanced to integrate organically in an environment to make us feel at home.*

”

## **Our values**

### **Danish identity**

Halo Design was founded in 1994 by the Danish entrepreneur Michael Waltersdorff at the age of 18.

### **Nordic design**

We believe that by studying our roots and constantly developing our design language, our light solutions are highly distinctive yet recognizable on the global market.

### **Functionality**

We want our products to improve everyday life. For this reason, we integrate our lamps with interesting features that enhance the user experience in original ways.

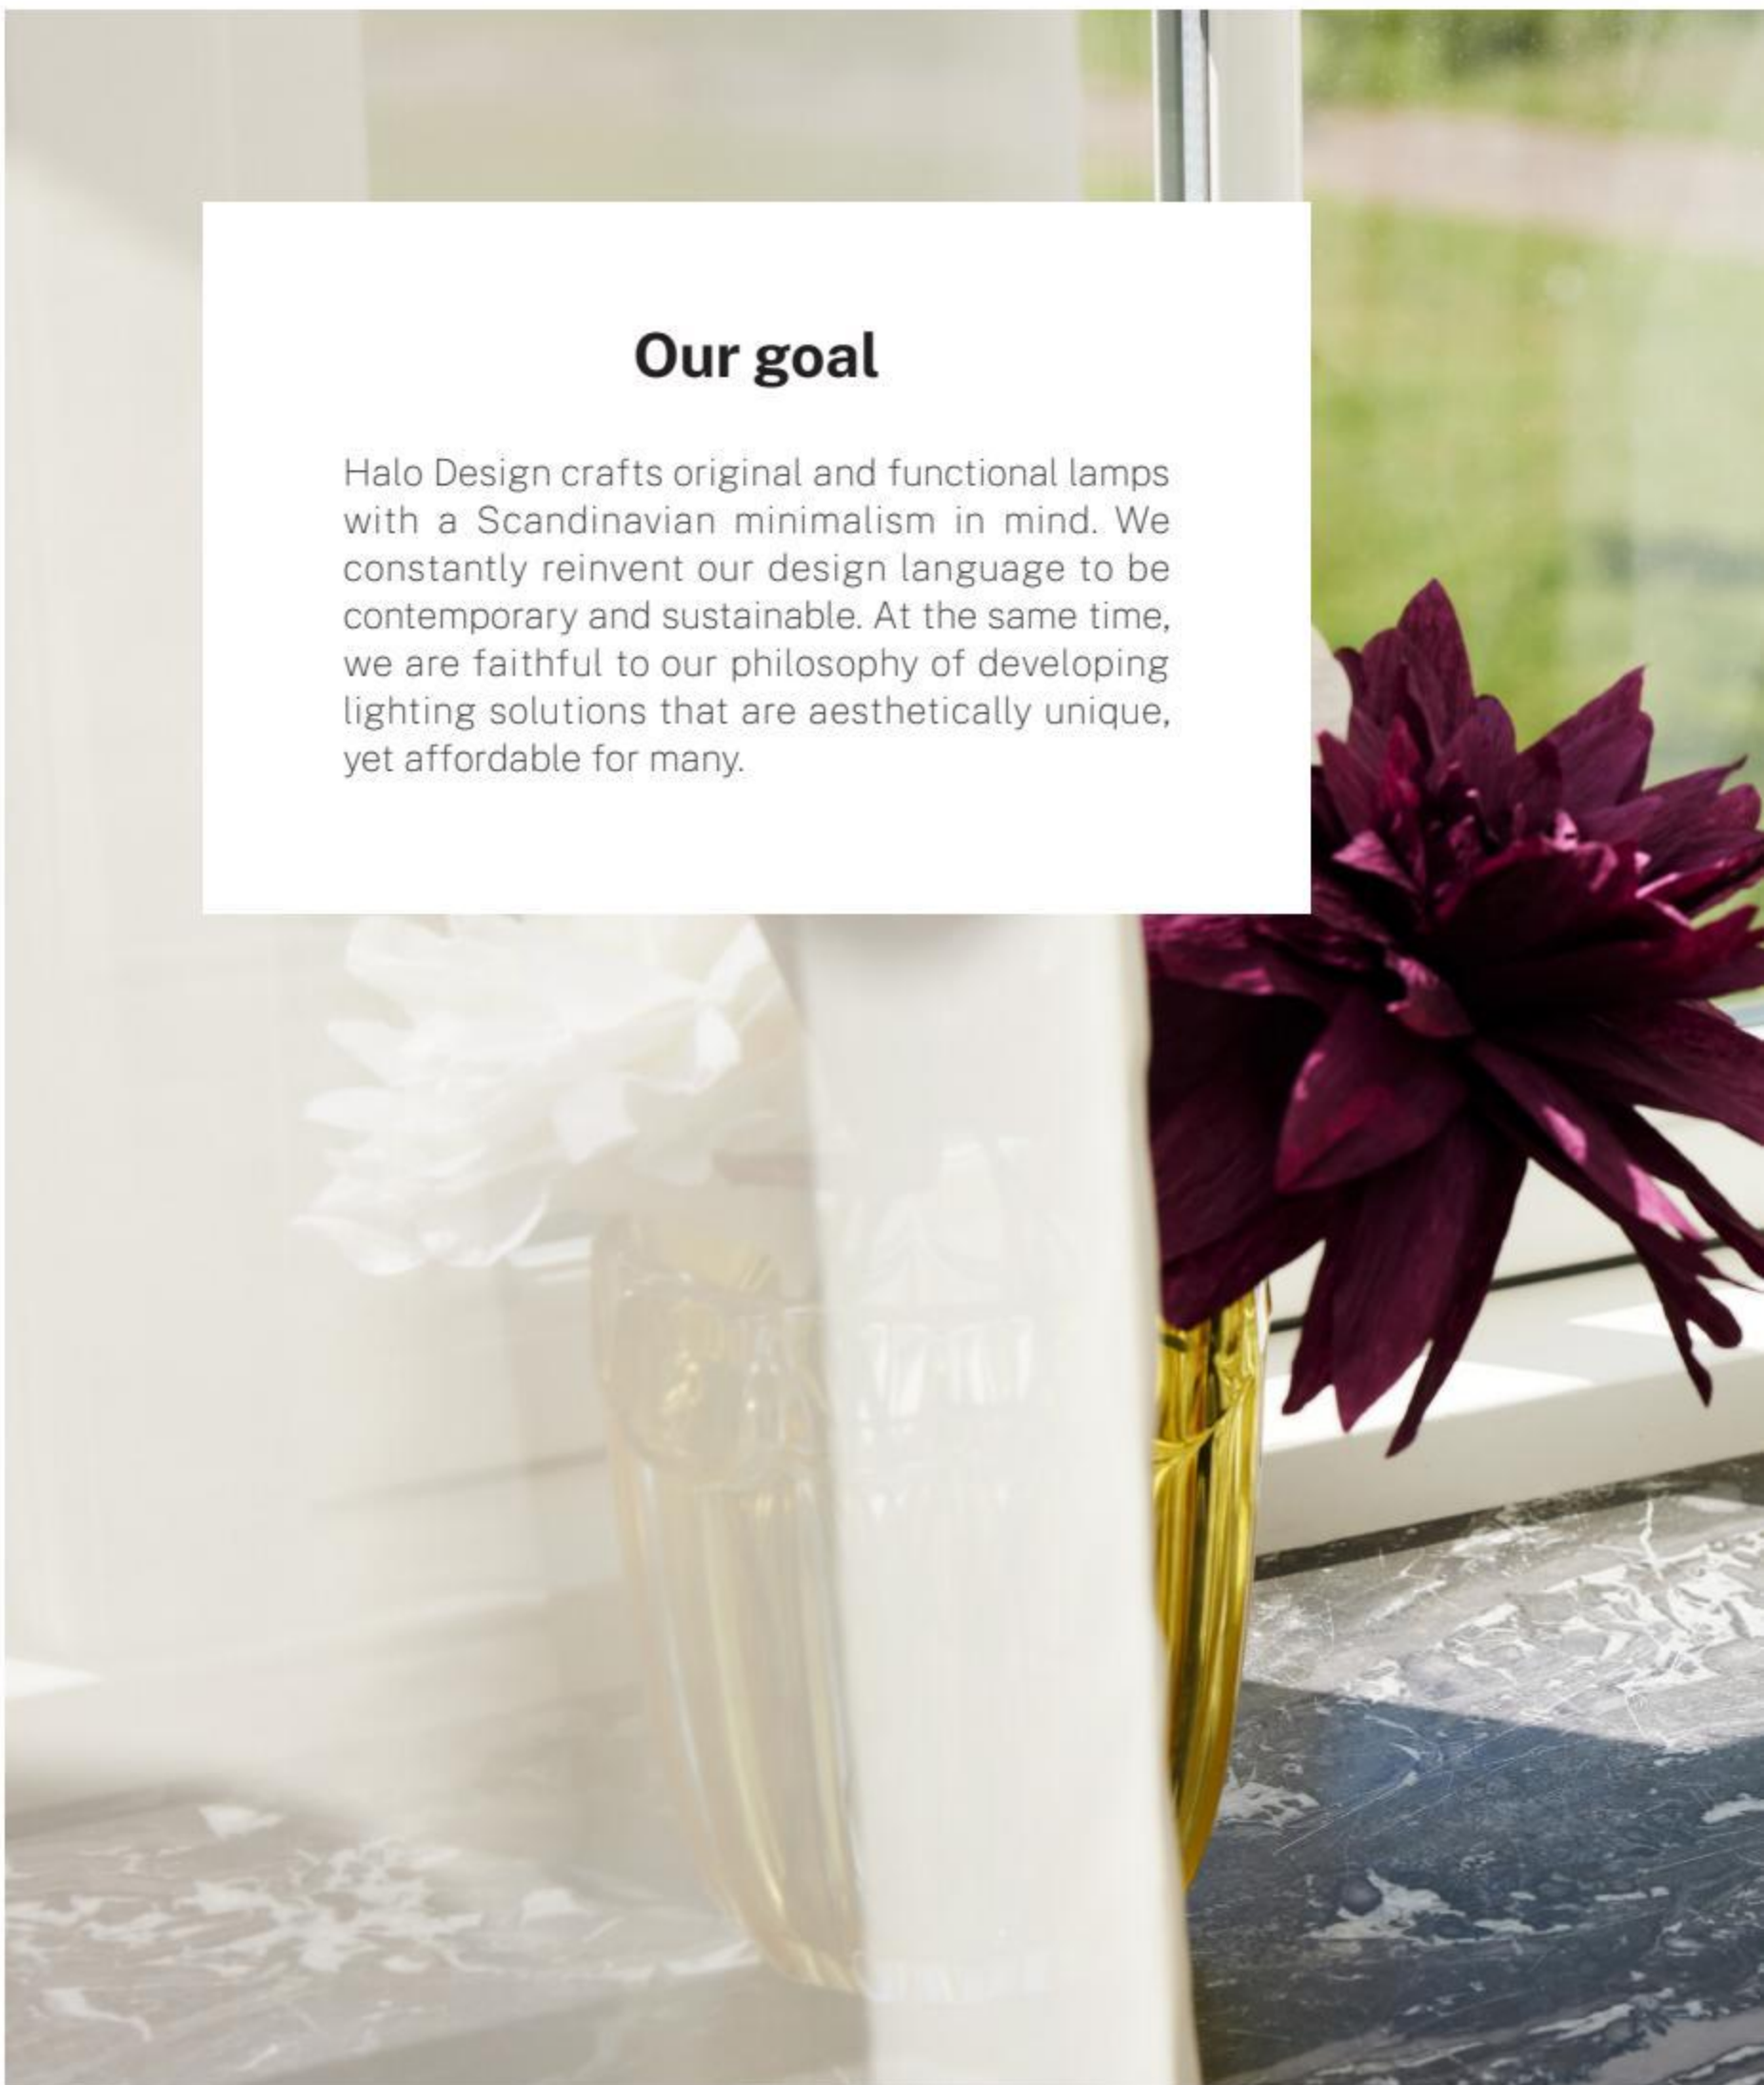

### **Value for money**

Good design is truly great when it can offer a unique experience at a reasonable price. We always seek to develop feasible solutions that balance aesthetics and functionality.

## Our goal

Halo Design crafts original and functional lamps with a Scandinavian minimalism in mind. We constantly reinvent our design language to be contemporary and sustainable. At the same time, we are faithful to our philosophy of developing lighting solutions that are aesthetically unique, yet affordable for many.

### Pivot

Pivot is the result of a long phase of research and development to achieve a lamp that is both elegantly minimalistic and highly functional.

Page 28

### Kjøbenhavn

A series of lamps that combine traditional aesthetic elements with modern functionality and efficiency.

Page 18

### Bubbles

The apparently simple shape of the Bubbles is actually a deep study of geometry, where proportions are balanced between the three spheres that make up each product.

Page 12

### Orbit

A compact design made from noble materials. Orbit is all this and more: a family of lamps that incorporates a high technical level with an evocative and simple shape.

Page 36

### DC

DC is a family of lamps with a simple and Scandinavian inspired design, thanks to its round shapes and the combination of metal and oak wood.

Page 70

### Oslo

Oslo is an elegant family of lamps made of metal and oak wood. The combination of the materials gives the lamps a minimalistic and Scandinavian look.

# The Collection

## Bubbles

The apparently simple shape of the Bubbles lamps is actually a deep study of geometry, where proportions are balanced between the three spheres that make up each product. The final appearance offers a play of transparencies and reflections and a wide choice of colors thanks to the combination of different glass and steel element finishes.

## Wrong

Wrong has a curious look that is difficult to express in words. The shape of the mouth blown opal glass is asymmetrical and changes continuously depending on the point of view of the observer, giving the feeling of having several lamps in one. Definitely a family of lamps that must be seen in person to appreciate its aesthetic quality!

## Atom

Halo Design's Atom series is inspired by the structure of atoms and their rotating electrons. An in-depth study of modern lighting needs has resulted in a unique collection of malleable lighting, where each lamp offers the ability to customize its appearance. In this way you can easily and comfortably create the most suitable version for your environment.

## Marble Eclipse

Throughout history, eclipses have inspired fascination and even fear. In the Marble Eclipse lamp, a combination of marble for the base (in three different finishes) and simple metal elements with matte and reflective surfaces create pleasant lighting effects and a welcoming atmosphere.

## DC

DC is a family of lamps with a simple and Scandinavian inspired design. Thanks to its round shapes and the combination of metal and wood, this range immediately became one of our classics. The veneered oak arch also has a very important function in rotating the shade of the lamps and directing the light freely. The details obtained from solid aluminium complete a unique design that is highly appreciated worldwide.

## Århus

The name of this series was inspired by the city of Århus, often referred to as 'The City of Smiles'. The lamps, in fact, have a shape that recalls a smile in the upper part of the metal cover which makes its appearance unique. The combination of the cylindrical wooden element with the metal cover offers not only an interesting aesthetic but also an additional functionality: the possibility of adjusting the direction of the shade in floor and table lamps.

## Nivå

Nivå is a series of lamps creating balance between the industrial vibe and nature. The metal shade and white lacquered inside surface ensure that the main part of the light is channeled in a straight direction. The lamps are decorated with a unique circle made of mahogany that ensures a nice transition, where the light will create an elegant stripe of light.

Designed by Emanuele Patton & Michael Waltersdorff

## Ball Ball

Ball Ball—as the name says this is a combination of two spheres, melted together in a sophisticated mouth blown glass. Ball Ball is an elegant series of 3 glass pendants. The soft round organic edges created by the curves of the glass reflects the light and casts the shadows to the surroundings.

## Halo

The Halo series is the result made by a special laser technique, where the aluminium is crafted with extreme precision. The details are often seen on vintage motorbikes, from where we got our inspirations. The series comes with different combinations and colours and is truly a first mover. We recommend using our range of decorative bulbs, to get the right look as you see from the photos.

## Baroni

With its beautiful white opal glass and details in brushed metal, the Baroni series is a true classic yet modern at the same time. The high quality of the glass makes sure to obtain a diffuse light that can illuminate in a very effective and decorative way. Baroni is available in various sizes and for different functions: as pendant, table lamp and floor lamp.

## Vintage

Made of solid wood complete with a turned metal lampshade. The lamp rotates 180 degrees from the wall plate, and the reach can be extended as desired. The head is tiltable, and it can be fixed to the desired position by means of the locking wing nuts. The lamp combines functionality and high-quality materials, expressed through the wood and metal details.

## Drops

Icicles forms when the conditions are right at winter, snow-covered trees and frozen water, and creates the most beautiful drops, from where we took the inspiration to Drops series in 1996. The unique result is thanks to the silky opal mouth blown glass, which is produced by one of the best glass factories in Europe.

## 1123

In 1994 when Halo Design was established, the company was situated in Copenhagen, Gothersgade no. 163. The zip code was 1123 Kbh K. The first ideas for a multi layer shade were made back then, and from that we found an old sketch made by Michael for this series.

## IQlight® - The Variations

### 22+ variants with just 1 module

IQlight® is a self assembly lighting system made up of interlocking quadrilaterals. Lamps of various shapes and sizes can be constructed by linking together the identical elements. The standard IQlight® pack contains 30 modules.

The variations shown below are proven variants using from 9 to 120 modules. Taking into consideration, that the IQlight® module is available in 6 sizes, that's at least 132 different lamps you can make with IQlight®. But the only limit is your own imagination really. Play around with the small test modules included in the kit-perhaps you can create your very own and unique variant?
